Science and God

Do You Have to Choose?

Can science and faith mix?

Teens come face to face with this question as their studies consider everything from the origins of the world to how DNA works. This captivating book is full of interesting facts and surprising stories that make the case for the Christian faith while exciting teens about science.

Science and God is a collaboration between Oxford University scientist John Lennox and Katy Morgan, an author for young people. The book is both fun to read and serious about science and faith. Readers will explore...

- whether you can be a scientist and believe in God
- the purpose and limits of science
- why it's reasonable to believe in God
- how miracles and creation connect with science
- evidence for Jesus' resurrection

No faith commitment or prior knowledge of science is needed for curious teens to consider the relationship between science and Christianity. They will learn as they engage with the topics covered and will be inspired to ask good questions about life, Jesus, and the nature of the universe.

Endorsements

“Here is crystal clarity on an issue that confuses and deters many would-be believers. This book is so worth reading and passing on to your science-loving friends—whether you or they are a Christian or not.”

Glen Scrivener

Evangelist and Blogger

“This is an engaging, compelling, and accessible book on one of the most significant topics today. John Lennox and Katy Morgan show us that, rather than science discrediting belief in God, belief in God actually provides a reason and motive for science. This is a book which will make all of us think, whether we’re scientists, Christians, both, or neither. Highly recommended.”

Sam Allberry

Pastor at Immanuel Church, Nashville; author of *Is God Anti-Gay?* and *What Does God Have to Say About Our Bodies?*

Suggested Interview Questions

1. Why is it crucial for young people to understand that science and faith aren’t inherently at odds?
2. How does the book redefine “faith” beyond a purely religious context?
3. What’s the danger of believing science can explain everything?
4. Why do you emphasize biblical interpretation alongside scientific discovery?
5. What core arguments from science does the book present for a Creator?
6. How does the historical evidence for Jesus’ resurrection fit a scientific mindset?
7. Beyond facts, how can Christianity be “tested” through real-world impact?
8. Why is acknowledging “faith” in atheism an important point for discussion?
9. What societal benefits does the book link to Christian values?
10. Ultimately, why is a book like this so important for today’s generation?

About the Authors

John Lennox is an Emeritus Professor of Mathematics at the University of Oxford and Emeritus Fellow in Mathematics and the Philosophy of Science at Green Templeton College. He is also an Associate Fellow of the Said Business School. He is particularly interested in the interface of science, philosophy, and theology. Lennox has been part of numerous public debates defending the Christian faith against well-known atheists including Richard Dawkins, Christopher Hitchens, and Peter Singer. He is the author of a number of books, including *Can Science Explain Everything?* and *Where Is God in a Coronavirus World?*.

Katy Morgan is a Senior Editor at The Good Book Company and the award-winning author of *The Songs of a Warrior* and *The Promise and the Light*. She loves helping children and young people grow in knowledge and love of Jesus, and volunteers in the youth work at her church, King's Church Chessington in Surrey, UK. She holds a master's degree in classical Greek literature from Cambridge University.
